- 07 What Colakin's Team Should Build

#0D1117

Dark Background

Primary Background

Website bg, email bg

#7C3AED

Brand Purple

Primary Brand Colour

Buttons, headings, icons

#A855F7

Accent Purple

Secondary Accent

Highlights, hover, rings

#F9FAFB

Primary Text

Body & Heading Text

All text on dark bg

#9CA3AF

Secondary Text

Captions & Labels

Metadata, small text

#4B5563

Tertiary / UI Grey

Borders & Dividers

*Rules, card borders***Colour Rules**

- ✓ Always use exact hex values — no approximations
- ✓ Dark background (#0D1117) is default for all branded digital surfaces
- ✓ Purple (#7C3AED) is the ONLY accent colour — do not add red, blue or green
- ✗ Do not use the brand purple as a background fill for large areas
- ✗ Do not use light backgrounds unless specifically building a light-mode variant
- ✗ Do not use gradients — flat colour only

02 Typography

Style	Weight / Size	Use For	Notes
Display / Hero	Sans-serif, bold, tight tracking	Large headlines on dark bg	No decorative or script fonts
Section Headings	Sans-serif, bold, normal tracking	Section titles, card headers	Consistent weight hierarchy
Body Copy	Sans-serif, regular, 10–12pt	Paragraphs, descriptions	Minimum 1.5 line spacing
Labels / Metadata	Sans-serif, regular, 8–9pt	Tags, dates, secondary info	Grey (#9CA3AF) on dark bg
CTA Buttons	Sans-serif, bold, all-caps OK	Primary action buttons	Purple bg, white text only

03 Logo & Wordmark Usage

Primary — dark background

Light variant — white/light background

- ✓ Always show AMPERZ in regular weight, AND in bold purple
- ✓ Minimum clear space = height of the wordmark on all sides
- ✓ Use dark variant on all digital surfaces by default
- ✗ Do not recolour — purple on AND is mandatory, always
- ✗ Do not stretch, rotate or apply drop shadows
- ✗ Do not place on busy photographic backgrounds
- ✗ Do not use the wordmark smaller than 80px wide on screen

04 Tone of Voice

Authoritative, not arrogant

We speak with confidence because we know our space.
We don't lecture or condescend.

Modern, not buzzword-heavy

"Agentic workforce" is meaningful — we explain it.
We avoid hollow phrases like "synergy" or "disruptive."

Direct, not brusque

We get to the point. Short sentences. Active verbs.
We respect the reader's time.

Human, not corporate-robotic

We're building something new and we mean it.
A little warmth is fine. Chest-thumping is not.

Outcome-led, not feature-led

"Your team does less repetitive work" beats
"our platform has 47 automation nodes."

05 Digital UI Standards

Buttons:	#7C3AED background, #F9FAFB text, 6–8px border radius, bold label
Links:	#A855F7 colour, no underline by default, underline on hover
Cards / Panels:	Slightly lighter than bg (#161B22), subtle 1px border #4B5563
Input fields:	Dark bg, #4B5563 border, white text, purple focus ring
Icons:	Line-style SVG only, #9CA3AF default, #A855F7 on active/hover
Spacing:	8px base unit — all padding/margin multiples of 8px
Border radius:	6–8px for cards and buttons. 50% for icon circles/rings only
Animations:	Subtle only — fade, pulse on signal rings. No spinning loaders.
CTA primary:	"Book a Live Build Session" — purple button, white text
CTA secondary:	"Learn More" / "See How It Works" — ghost button, purple border

SECTION LABEL

Agentic Workforce Solutions

Powered by Colakin DEX

HEADLINE

Replace Your Workflow. Not Your Team.

SUBHEADING

Amperzand deploys AI agents that handle the repetitive, rules-based tasks consuming your team's time — from document processing and data entry to customer triage and reporting.

BODY COPY

Working in partnership with Colakin, Amperzand brings the DEX Agentic AI Platform to UK and EMEA enterprise clients. DEX isn't a chatbot or a Claude API wrapper. It's a configurable agentic workforce — built around your real business problem, connected to your existing systems, and delivering measurable ROI from day one.

HOW IT WORKS

We start with your problem, not a demo. In a live build session, we show you exactly what DEX can do with your data, your workflows, your outcomes. No slides. No hypotheticals. Just results.

THREE FEATURE POINTS (ICONS + ONE-LINERS)

Built on your real data

Not a generic demo — configured to your specific workflow from session one.

Connects to existing systems

Integrates with your CRM, ERP, documents and data sources without ripping and replacing.

Measurable ROI from day one

Track hours saved, error rates reduced, and throughput increased from the first deployment.

UK Partner Website / Landing Page

Dev site: <https://amperzand.pages.dev> | Live domain: <https://amperzand.co.uk>

- Review the existing 8-section site against this brand guide
- Build or adapt the Colakin partner page to match The Signal brand
- DEX service section copy provided on page 5 — ready to implement
- All DNS/hosting changes go via Simon (Cloudflare dashboard)

CRM Setup

Primary email: hello@amperzand.co.uk | Aliases available on request

- Route all web leads to hello@amperzand.co.uk or a dedicated leads alias
- Tag Amperzand contacts with UK/EMEA territory and source channel
- Align CRM fields with Amperzand service lines: Consulting, DEX, EMEA Advisory

Lead Capture Forms

■ ICO registration pending — forms go live after registration only

- Forms must be GDPR/UK GDPR compliant with explicit consent checkbox
- Embed code to be sent to Simon for deployment via Cloudflare Pages
- Suggested form fields: Name, Company, Role, Email, Service Interest, Message

GTM Tracking

No analytics currently live — GTM to be configured by Colakin team

- Provide GTM container snippet — Simon will add to index.html and redeploy
- Set up goals: form submissions, CTA clicks, time on DEX section
- GA4 property to be created — confirm who holds the Google account

Marketing Framework

Agreed deliverable: GTM strategy, content framework, campaign structure

- Align campaign messaging to Amperzand tone of voice (page 4)
- All creative assets must use exact brand hex codes (page 2)
- Primary CTA across all channels: 'Book a Live Build Session'

All queries and access requests: Simon Christopher
